

Leonardo: Qatar's NH90 helicopter programme marks major milestone with first flights

- **Last week the first of 12 NH90 NFH naval helicopters and the first of 16 NH90 TTH over-land variant took to the air from Leonardo's Venice Tessera facility and Airbus Helicopters' Marignane site respectively.**
- **As well as acting as prime contractor for the overall programme, Leonardo is responsible for the final assembly and delivery of the 12 NH90 NFH helicopters from its Venice Tessera facility. The company is also providing a support and training services package for crews and maintenance technicians.**
- **Acceptance of the first batch of NH90s by the Qatar Emiri Air Force is scheduled to start before the end of 2021, with the last helicopter planned to be delivered in 2025.**
- **Managed through the NHIndustries joint venture, the NH90 is the largest military helicopter programme in Europe. Around 430 units are in service worldwide and the platform has logged over 270,000 flight hours in a wide range of weather and environmental conditions, over land and sea.**

Rome, 23 December 2020 – The Qatar Emiri Air Force's NH90 helicopter programme marked a major milestone last week with first flights performed in Italy and France. The first NH90 NATO frigate helicopter (NFH), assembled at Leonardo's Venice Tessera facility, and the first tactical troop transport (TTH) over-land aircraft, assembled at Airbus Helicopters' Marignane site, took to the air on 15th and 18th of December respectively. The flights allowed crews to evaluate general handling and basic systems and the helicopters performed as expected.

Qatar's NH90 programme includes 16 NH90 TTHs for land operations, 12 NH90 NFHs for naval missions, a comprehensive support, maintenance & training services package and associated infrastructure. The programme has the potential to be extended in the future with the addition of 6 + 6 units in a mixture of TTH and NFH variants. Leonardo is prime contractor for the overall programme and is also responsible for the final assembly and delivery of the 12 NH90 NFH helicopters from its Venice Tessera facility. The company is also supplying simulators, training aids and an extensive maintenance support and training services package for aircrews and maintenance technicians. Leonardo is providing, contributing to or supporting the integration of various avionics and sensor payloads, including the Leonardo LEOSS-T HD electro-optical system, HD Mission Video Recorder, Automatic Identification System, Tactical video link and Full HD display for cabin consoles. Airbus Helicopters is responsible for carrying out the final assembly of the 16 NH90 TTH aircraft. Acceptance of the first batch of NH90s by the Qatar Emiri Air Force is scheduled to start before the end of 2021, with the last helicopter planned to be delivered in 2025.

Leonardo, a global high-technology company, is among the top ten world players in Aerospace, Defence and Security and Italy's main industrial company. Organized into five business divisions, Leonardo has a significant industrial presence in Italy, the United Kingdom, Poland and the USA, where it also operates through subsidiaries such as Leonardo DRS (defense electronics), and joint ventures and partnerships: ATR, MBDA, Telespazio, Thales Alenia Space and Avio. Leonardo competes in the most important international markets by leveraging its areas of technological and product leadership (Helicopters, Aircraft, Aerostructures, Electronics, Cyber Security and Space). Listed on the Milan Stock Exchange (LDO), in 2019 Leonardo recorded consolidated revenues of €13.8 billion and invested €1.5 billion in Research and Development. The Group has been part of the Dow Jones Sustainability Index (DJSI) since 2010 and is named as sustainability global leader in the Aerospace & Defence sector for the second year in a row of DJSI in 2020.

Gian Piero Cutillo, Leonardo Helicopters MD, said “We’re extremely pleased to celebrate this important achievement as we continue to work to deliver this programme. The NH90 is set to provide the Qatar Ministry of Defence, an important and longstanding customer, with outstanding operational capabilities suitable for a range of missions. Together with our industrial partners, we’re committed to completing and introducing this essential defence and security enabler for our customer.”

NOTE TO EDITORS ON LEONARDO CONTRIBUTION TO THE NH90 HELICOPTER

Leonardo is responsible for, or contributes to, the design, production and integration of a wide range of critical NH90 components and systems. These include the rear fuselage, main gear box hydraulic system, upper modes of the Automatic Flight Control System (AFCS), plant management system, power plant integration, NFH mission system (integrating sonar, radar, electro-optics, tactical link, electronic warfare system, Identification Friend or Foe (IFF) interrogator, mission video recording and weapon systems management including air-to-surface missiles and torpedoes for Anti-Surface Warfare (ASuW) and Anti-Submarine (ASW) missions. Leonardo also integrates additional capabilities such as the Laser Obstacle Avoidance Monitoring (LOAM) system and the LEOSS-T electro-optical system, as well as pintle-mounted gatling-type guns, for specific customers.

NOTE TO EDITORS ON THE NH90 HELICOPTER

The largest military helicopter programme in Europe, the NH90 is the optimal choice for modern operations thanks to its fully composite airframe with a large cabin, its excellent power-to-weight ratio and its wide range of role equipment. It features a quadruplex fly-by-wire flight control system for reduced pilot workload and enhanced flight handling characteristics. The NH90 is available in two main variants: one specified for naval operations, the NH90 NFH (NATO Frigate Helicopter) and the TTH (Tactical Transport Helicopter) for land based operations. As of today, around 430 NH90 helicopters, a mixture of both variants, are in service worldwide. Aircraft on operations have logged over 270,000 flight hours in a wide range of weather and environmental conditions, over land and sea.

ABOUT NHINDUSTRIES

NHIndustries is the largest rotorcraft Joint Venture in European history and it is responsible for the design, manufacture and support of the NH90 helicopter, one of the leaders in the latest-generation of military helicopter. The Company company takes the best from European Rotorcraft and Defence Industry, being owned by Airbus Helicopters (62.5%), Leonardo (32%) and GKN Fokker (5.5%). Each company has aerospace pedigree and brings the top of its skills and expertise to the end product.
